CAPABILITY STATEMENT

SOFTWARE DEVELOPMENT:

Kaltech Solutions specializes in custom web design and software development, emphasizing value-driven methodologies. Our solutions feature offline functionality and seamless server synchronization for optimal performance. Leveraging open-source tech and implementing Progressive Web Apps, we prioritize scalability and modular design. Our UX/UI focuses on intuitiveness and visual appeal for superior user experience. With DevOps tools, we streamline development processes, ensuring continuous project delivery through CI/CD practices. We also offer Project Management Support to align projects with business objectives, meet deadlines and budgets, and deliver expected value.

CLIENTS:

- Department of Energy
- Department of State
- Department of Labor Bureau of Statistics
